

Beachcomber's Heatshield Cover keeps heat in, and cold out!

Superior Insulation Saves Money

Beachcomber Heatshield Covers insulate your hot tub just like a thermos bottle. Our heavy foam inserts keep the heat in and the cold out, saving you energy and money. These foam inserts act like barriers, to prevent the penetration of moisture laden air, either coming in, or going out. This insulating cover keeps the heat that you pay for, where it belongs... in your hot tub!

Our special Heat Bumper Seal provides an efficient barrier to seal in the heat, and prevents water vapor and air from escaping. Beachcomber Heatshields – superior hand-made stitching and craftsmanship, quality and durability – and guaranteed for any climate!

A History of Quality Inside

Beachcomber hot tubs has 30 years of experience building quality hot tubs, and has always been committed to providing straight forward, honest information to our customers. We have been building covers for 30 years, for different markets and climates all around the world. This pamphlet shows you how our heatshield covers are built to withstand any climate, from the harsh northern winters, to the hot California sun. Every Beachcomber Heatshield Cover is built to meet or exceed stringent ASTM quality and safety Government standards.

Two Year Guarantee

All Beachcomber Heatshield Covers are guaranteed for two years against manufacturer defects in materials or workmanship.

YEAR
Guarantee

Our Commitment to GREEN

You pay a lot for energy. You need every advantage to save money and conserve, and at the same time, get the relaxation and therapy you need. We have been energy conscious since 1978. With our 4WALL Insulation system, HushPump, EnviroSkirt Cabinetry, Perma-Seal Foundation and more, we have an energy efficient package that gives you the best performance in a hot tub. Year in and year out, your Beachcomber will give you enjoyment and relaxation, for just pennies a day.

Our Heatshield Covers meet or exceed minimum R12 insulating value requirements with over 45% more insulating value than other covers. A Beachcomber Heatshield Cover could save you \$500 a year in heating costs over lesser quality spa covers available today for less money. We want to help you get the most from your hot tub investment.

Beachcomber Heatshield Covers – Minimum Energy Use, Maximum Efficiency

Superior Energy Efficiency

Beachcomber Power Guard and Original Heatshields are POWER SMART® endorsed products. They not only meet minimum R12 insulating value, they exceed it. With over 45% more insulating power than standard hot tub covers*, Beachcomber brand Heatshields could save you up to \$500 per year in heating costs, versus old inefficient covers that provide little to no insulating value+. An energy efficient heatshield will reduce heating costs. Buy a Beachcomber Heatshield today.
